## Introduction

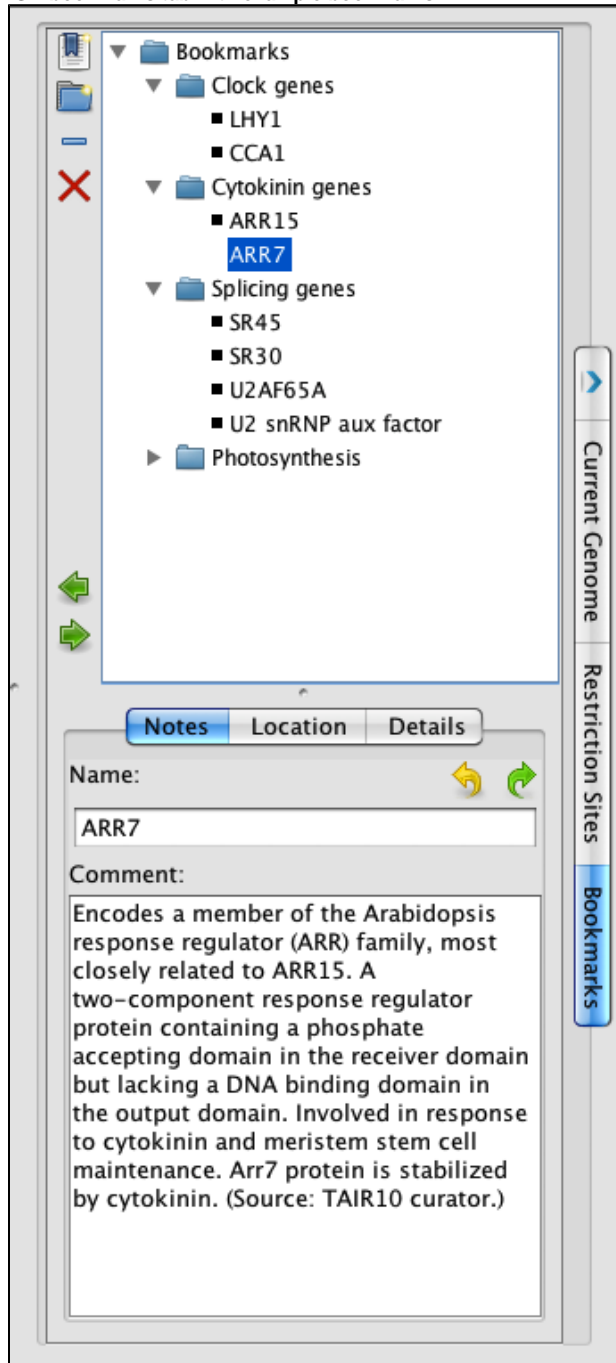

Use IGB bookmarks to:

- Jump to a bookmarked location and re-load data.
- Make notes on a genomic scene.
- Share analysis results with other users.

## Bookmarks tab overview

The **Bookmark** tab allows you easy access to the bookmark list and provides tools for managing and sharing bookmarks.

IGB bookmarks tab with example bookmarks

## Returning to a bookmarked region

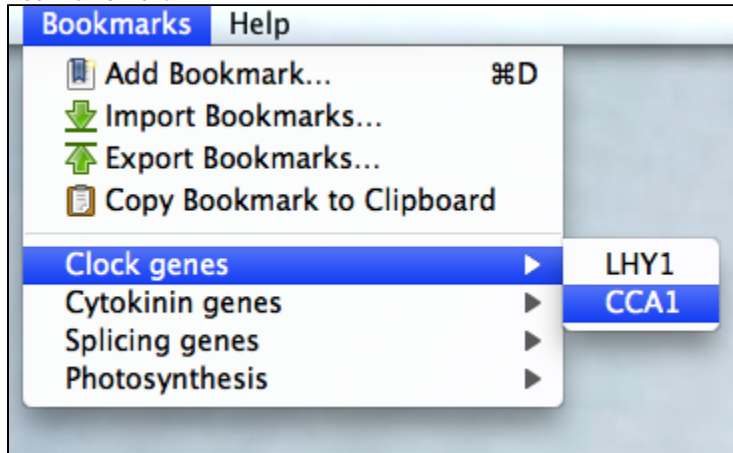

To return to a bookmarked region,

- Double-click it

or

- Choose the bookmark from the **Bookmarks** menu

#### Bookmarks menu

## Creating new bookmarks

To bookmark a location and data scene

- Choose **Bookmarks > Add Bookmark**

or

- Click **Bookmarks** tab

- Click add the **New Bookmark** icon

A window will appear with places to enter a name, notes, and bookmark type.

#### New bookmark window

A screenshot of a 'New bookmark window' titled 'Enter Bookmark Information...'. The window has a light gray background. At the top, there is a checkbox labeled 'Use Default Name' which is unchecked. Below it is a 'Name:' label followed by a text input field containing 'ARR15'. Underneath is a 'Comment:' label followed by a larger text area containing the text: 'Type-A response regulator; negative regulator of cytokinin signaling. RNA-Seq suggests it is up-regulated by cold.' At the bottom, there are two radio buttons: 'Position Only' (which is selected) and 'Position and Data'. At the very bottom are two buttons: 'Cancel' and 'OK'.

## Bookmark types

**Position Only** bookmarks record genome, current position and zoom level.

**Position and Data** bookmarks record genome, current position, zoom level, and data sets.

# Managing bookmarks

You can sort your bookmarks into folders and associated comments with comments on folders.

To edit the name or comments associated with a bookmark or folder

- Click **Bookmarks** tab.
- Click to select a bookmark or folder.
- Edit name or comments in the Notes sub-tab.

To delete a bookmark or folder

- Click to select it
- Click the delete bookmark icon (red X) or press Delete

## Exporting and Importing bookmarks

To save a copy of the bookmarks to a file

- Choose **Bookmarks > Export Bookmarks...**

To import another user's bookmarks

- Choose **Bookmarks > Import Bookmarks...**

Bookmarks are saved as a single file in an HTML-based format. Use caution if you choose to edit the file.

You can import multiple sets of bookmarks during the same IGB session. Imported bookmarks will be added to the end of the list of existing bookmarks.

## Viewing bookmark properties (for advanced users)

To see when a bookmark was created and the region it refers to

- Click **Bookmarks** tab
- Click the bookmark to select it
- Click **Location** sub-tab

To see other properties of a bookmark

- Click **Bookmarks** tab
- Click the bookmark to select it
- Click **Details** sub-tab

or

- Click **Bookmarks** tab
- Right-click a bookmark
- Select **Properties..**

A new window will open that reports information about the bookmark and how IGB represents it internally.

To see how IGB combines these properties into an IGB bookmark, export your bookmarks and open the bookmarks file in a text editor to inspect bookmark syntax.

## IGB bookmarks file

IGB saves your bookmarks at the end of each session in a file named bookmarks.html in a folder named .igb in your home folder.
